

Shaping Change:

Natural Resource Management, Agriculture and the Role of Extension

Edited by Drs Jennings, Packham and Woodside

Shaping Change presents the current state of play of Extension, and its role in Natural Resource Management and commercial agricultural industry for the Australasia-Pacific region.

It is a prime text for under- and post-graduate students, and an essential reference manual for new and experienced Extension professionals alike, be they engaged exclusively in environmental conservation, agricultural productivity or, more commonly, both. Over 35 leading thinkers and authors of Extension have contributed works regarding:

- the historical origins and developmental path of Extension;
- a wide array of current principles and practices for enabling change;
- the effective building of social and community capital; and
- the economics, policy dimensions and markets of Extension.

This book provides a much needed resource for anyone interested in shaping individual and/or community level change within challenging and often conflicted social and political environments, in pursuit of better lifestyles, livelihoods and landscapes for all of us, now and in future.

To order: Please include the number of copies, postal address, telephone/mobile number and student number if applicable.

by email to: info@apen.org.au

GARDINER FOUNDATION

***Shaping Change** is a collection of contemporary papers on "extension" in the agricultural sector. The Foundation sees the book as a catalyst to trigger a move to smarter innovation processes that draw the elements of research, development and extension into one integrated project plan that changes the face of dairy. The Foundation has provided funding for the design and printing of the book and in addition will focus on these innovation processes in a workshop format during 2011.*
